As of 2007, 12.8% of the United States population will be over the age of 65. Of course, that number is expected to increase as the baby boomers continue to age. It is because of this that the idea of aging in place has suddenly become so popular. Aging in place, for those who are unfamiliar with the term, is the ability to continue to live in your residence, safely, and being able to maintain your independence, all while giving your family peace of mind.

Sunnyvale Windustrial is proud to announce the arrival of their "Extended Living Center", a showroom that showcases exciting new products from manufacturers like American Standard, Symmons, Toto, and introducing AKW! Walk-in tubs, ADA compliant faucets and toilets, grab bars, and level entry showers are just a few of the numerous products that are featured in this showroom. Come by and see all of our exciting aging-in-place products!

A special thanks to the vendors who helped make this possible -
